PROFILE

Bachelor of Computer Science (S.Kom) in Informatics Engineering with experience in developing end-to-end web applications, covering both front-end and back-end development. Proficient in building responsive and efficient user interfaces using React.js, as well as designing and integrating RESTful APIs and server-side systems. Experienced through Bangkit Academy, Coding Camp powered by DBS Foundation (Dicoding), and a Fullstack Developer internship. Strong problem-solving skills, structured work approach, and the ability to collaborate effectively in development teams.

EDUCATION

Universitas Alma Ata

2021 - 2025

Bachelor of Computer Science – GPA: 3.75/4.00

EXPERIENCES

Independent Study – Coding Camp powered by DBS Foundation

Feb - July 2025

- Frontend and Backend Developer learning path at Dicoding Indonesia.
- Capstone project: Web Weather Prediction as a Fullstack Web Developer.
- Developed frontend using React.js and backend API using Flask.
- Integrated Machine Learning models into the web application.

Fullstack Developer Intern – Sekolah Tumbuh

Oct 2024 - March 2025

- Developed the Tumbuh Hospitality & Arts School website using Laravel, including UI design, backend feature development, and database integration.
- Built responsive, consistent, and user-friendly web interfaces.
- Implemented content management features (CRUD) for the admin panel.

Independent Study – Bangkit Academy (MSIB Batch 5)

July - December 2023

- Machine Learning learning path.
- Studied Machine Learning and Data Science fundamentals, including Supervised & Unsupervised Learning, CNN-based Deep Learning, and model development using TensorFlow.

PROJECT

Weather Prediction Web App

June 2025

Weather prediction web application built using React.js on the frontend and Flask on the backend. Integrated a TensorFlow-based MLP Machine Learning model to generate weather predictions and display results interactively.

BISINDO Live Detection

May 2025

Real-time sign language detection web application using React.js and FastAPI, utilizing WebSocket communication for webcam streaming and REST API for image uploads. Implemented YOLOv11n and MediaPipe to optimize frontend-to-backend request handling.

DSF Digital Agency

February 2025

MERN-based website (MongoDB, Express.js, React.js, Node.js) developed with a CMS system on the backend. All content and frontend views are fully manageable through the backend admin panel for dynamic content updates.

SKILLS

Technical Skills

- Programming Languages: JavaScript, PHP, Python
- Frontend: React.js, Tailwind CSS, HTML, CSS
- Backend: Node.js, Express.js, Laravel, Flask, FastAPI.
- Database: MySQL, PostgreSQL, SQLite, MongoDB.
- Tools & Technologies: Git, GitHub, REST API, WebSocket, Google Colab, Figma, Vercel.
- Cloud Services: Basic Microsoft Azure, Basic AWS.

Soft Skills

- Problem solving and requirements analysis
- Team communication and collaboration
- Time management and work prioritization
- Adaptable to new technologies and learning
- Detail-oriented, responsible, and quality-focused
